

GYNELLA® Flora

Vaginal suppositories with three types of inactivated (tyndallized) lactobacilli – *Lactobacillus acidophilus*, *Lactobacillus reuteri*, and *Lactobacillus casei*. They help to maintain the balance of the vaginal flora when it was damaged due to infection, inflammation, or other external factors. Suitable for women seeking to support the balance of vaginal flora during or after infections, those using contraception, antibiotics, or other medications affecting vaginal microflora.

Active ingredients:

- *Lactobacillus acidophilus*
- *Lactobacillus reuteri*
- *Lactobacillus casei*

Main benefits*:

- Maintains balanced microflora, disrupted by different factors
- 3 strains ensure suitability for a wider range of women
- Suppositories ensure good solubility and easy application

Use:

One suppository into the vagina once a day, preferably in the evening before bedtime for 10 days following the last day of the menstrual cycle or according to medical indication. Contact your healthcare professional for more information / further advice. Keep between 2°C and 25°C.
